Vice Head Boy
Sarthak Agarwal

In today's times, machines are able to do almost every task of humans, that too more efficiently and in less time – thus making innovation the true mark of success. Innovation is when we are able to derive new solutions to problems around us, when we are able to re-invent a process or when we solve a problem none even knew existed. And this is not a talent anyone is born with but a skill that is developed.

A mind will only become innovative when it is regularly exercised. Thus, to achieve the goals in our life, to become innovative, we need to grab hold of each and every opportunity we get though not at the cost of others. Whether it be in the form of class presentations, school events, performances, matches or any other activity, you need to make use of the opportunities. And if they don't come your way, then create them. But don't ever stop, for life is a river in which if you are not moving forward – you will move backwards.

Therefore, I would like to thank respected Promini Ma'am, Vidyarthi Sir, Pandey Sir, Rashmi Ma'am and all the other teachers of the school for offering me this opportunity. I promise to give the best of my abilities.

I would also like to offer my gratitude to the school administrative staff and the helpers who create a learning environment for us. I hope we can together innovate and make the school a better place than it already is.
